Formed in 1935 D section or as more commonly known as "Don't ask section" was created to combat rumours of German departments that were exploring elements outside the boundaries of normal espionage namely the occult, mythology and anything to do with religion or "master races". Initially this was dismissed as ridiculous until in 1937 when up to 20 Nazi expeditions were documented around the globe, suddenly acquisitions from museums increased, leading academics disappeared and robberies involving unusual items were reported, even the Vatican (through unofficial channels) reported a disturbing vacancy in their records.

D section was unusual in all members came from lower middle to low class folk anywhere in the Commonwealth even in some cases criminals. The training was exhausting and designed to create men and women tough, independent, adaptable, smart and violent enough to succeed in any arena. As well as their wet works abilities education was equally expected so when they were not physically developing their skills they were learning languages, customs, research skills, etiquette and spy craft. In short cramming 10 years of experiences into 5.

The training was horrendous for every 50 trainees 30 washed out, 10 died (by accident or suicide), 3 go mad, 2 crippled and 5 graduate.

12th SS Division Swartz Todd (Black Death) - Waffen SS Regiment Wodin

Commanding Officer: Generaloberst Fredrick Kassel

Based: Spandou

Symbol: Sword and Lightning bolt

Strength: 3000 enlisted 200 officers + support researchers

Formed: 1936

Hitler obsessed with myth and legend formed this unit to acquire the treasures described in the hidden passages and cryptic clues of history in an effort to gain the reputed powers for himself and the Reich. The division works in autonomy with a free hand to do whatever, recruit whoever and any in manner short of jeopardizing national security (it's reputed even the Reich Marshall steps lightly in their matters)

Researchers and personnel are regularly sent abroad to obtain items and ancient manuscripts, alchemy, magical text (fraudulent or real) and religious icons are prime targets and no expense is spared to determine their nature or to ease their purchase. Its manpower is split between combat personnel and research members obtained from all areas of Nazi control as diverse as Occult, Medicine, Mythology, Engineering and Anthropology. Surprisingly it doesn't have a spy branch this is left firmly in the Gestapo's foreign department.
